

Flanged Type F gauge

Flanged Type D Gauge

### DESCRIPTIONS

We offer flanged pressure gauges that come standard with a 2 inch NPT thread, these gauges are easily viewable at distance. Standard flange size is 2-1/16", other flange size can be custom made.

### FEATURES

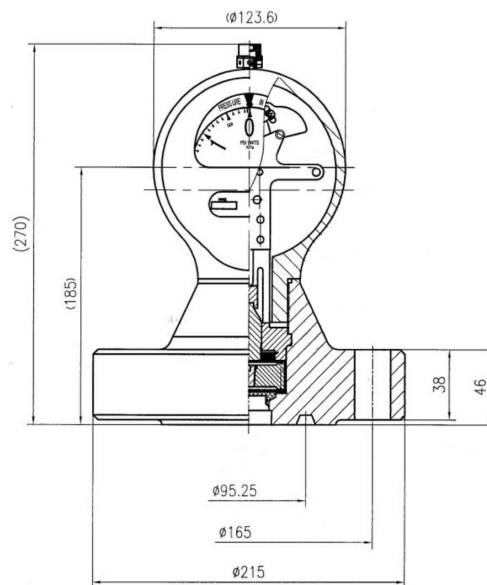

Gauge dial protected by impact-resistant, clear polymer lens provides fast, accurate readings at a glance.

Liquid filled gauge minimizes vibration and wear to gauge movement

Replaceable diaphragm rubber and field-repairable diaphragm make on-site service easy.

Rugged design enables accurate pressure measurement on cementing, acidizing, fracturing.

Flanged type D comes with a big dial. You can view the readings from big distance.
