PRODUCT OVERVIEW

This gauge has two types outlet signal: 4-20 mA remote signal, or RS485 signal based on the standard MODBUS RTU communication protocol.

This series of remote gauge uses four digit display, showing real-time pressure. while, the pressure signal can be remoted, transmission distance more than five hundred meters.

This series of digital remote transmission pressure gauge with built-in pressure.

Sensor, has powerful function, and users can change the pressure units, zero & error clearing, correction filter constant etc.. It has followed features: 304 stainless steel shell and connector, waterproof cable outlet, waterproof grade IP65, with a very wide range of medium applicability.

The product can replace the traditional pointer type pressure gauge or pressure transmitter for transmission.
